

# STEAM Night

STEAM stands for science, technology, engineering, art, and math. This year's STEAM night will be a virtual event with fun for the entire family. The event will have synchronous and asynchronous activities.

## SAVE THE DATE!

Our synchronous event will be a planetarium show presented by the Pacific Science Center. A zoom link will be sent out closer to the event. The event will be **Wednesday, March 24th at 6:30 pm.**

Our asynchronous event will be a google doc shared the week of STEAM night with clickable links. These links will have STEAM events for a wide-variety of ages and interests. Families can use these links however they want!

**NOTE:** The show and asynchronous videos are ASL interpreted.
